

Nicolas Chacin

CV

Profile

I am a Graphic Designer, specialized in design management. I know how to mix creativity, experience and knowledge in order to get a wonderful final result. I am capable to hear, understand and see the customer needs and desires. To me is more than exciting to develop a new product and project for a customer. I make a great job, working as a chief designer and illustrator in the development of Concept art projects, multimedia projects, software and web. I also give a dynamic, enjoyable and very effective training for design and illustration software integrated to communication systems and technology development. I follow the great passion I feel for this art, each time I develop a project, a design or an illustration. My technical skills and knowledge let me play creating until I get a high quality product. The smiling and happy face of my customer is my best reward. I know I have a lot to learn and improve, and I work hard for this. One of my main goals is to be more creative and proactive in order to make it better, this way the design projects that I make will get its highest potential.
